TO OUR CUSTOMERS PLEASE READ THIS

We are sending trees and plants to almost all the states and territories. Some of the states have passed laws to regulate the traffic in Trees and Plants. We wish to state that we have complied with such laws, as they are known to us and have given our bond where demanded, and will comply with any further laws, that may be enacted by any state. We also have the nursery inspected tags for states which demand such.

Packing—In order to be able to handle our fast increasing trade, we have built a new packing house and cold storage room of the newest and most approved pattern. Our trees are not exposed to sun or wind while being stored and packed. We guarantee that all plants and trees reach our customers in fresh, healthy condition, no matter where they go.

Care of Stock on Arrival—Promptly on arrival the trees or plants should be unpacked and planted, or else the roots should be protected from sun or air by covering with moist dirt. If the ground is frozen outside, or the packing material in the case frozen, store the original package in a cool, moist cellar until the conditions are favorable for case frozen, store the original package in a cool, handling. Care should be taken in choosing soil and environment to the end that success may reasonably follow your labors in planting. Shipments delayed in transit and which open up too

dry and appear to be shriveled, should be soaked in water over night, which will resuscitate them.

Claims—All claims for errors, shortage or anything else pertaining to your shipment, must be made promptly after receipt of goods. In writing us about your shipment, please remember to give order number and full particulars. Human help is not infallible and shipments as well as mail matters will miscarry, but please understand this: That the complete satisfaction of our customers is our first wish, and that we gladly rectify any and all errors on our part.

Prepaid Freight—We prepay freight charges to any railroad station in the United States (excluding steamship and stage charges), on all orders for Trees and Plants amounting to \$10.00 net or over, when one-third cash is sent with order. If you wish small trees, roses or flowering plants sent by mail, add 5 cents each for postage.

Remittance should be made by Postoffice or Express Money Orders, Bank Draft or Registered Letters. For amounts less than \$1.00 postage stamps can be sent.

Quality of Stock—Our Trees and Plants are well and carefully raised and grafting and budding are done by experienced workmen. Nothing is left undone to insure well developed, straight trees, with good even tops and without forks. You will find our trees graded to the sizes given in this catalogue, and you will get just what you order.

Replacing Stock That Dies—We guarantee to deliver the stock to our customers in good condition, and there our responsibility should end; but in order to meet our customers half way, when the seasons and conditions are unfavorable for planting, we have decided to replace AT ONE-HALF THE REGULAR CATALOGUE PRICE ALL STOCK THAT FAILS TO MAKE A GROWTH THE FIRST SEASON.

Replacing orders must be sent in on or before July 1.

We sell 5 at rate per 10, and 50 at rate per 100.

Club Orders. If a number of neighbors order together, I will tie each order separate with the purchaser's name attached, then pack all together in one box and I will pay freight on same, providing all orders together amount to \$10.00 or more for trees and plants. I will give the person sending me a Club order 10 per cent of the total amount of such orders in trees and plants. You must state, though, just what you wish for the amount, as otherwise you may get something you do not need, or do not care to plant. Please do not overlook this.

APPLES AND CRABS

We list below what we consider the very best varieties of apples for planting in this and like climates. They have proven their worth in hundreds of orchards, which recommendation counts for more than anything that may be said about them, and until some of the new and much advertised varieties show up as well under the same test, we will continue to recommend these as the best.

PEONIES

We have fifty named varieties of peonies in our gardens which cover the entire season of bloom and range in color from purest white to very dark red. Peonies are better planted in the fall but spring planting has always proven successful for us and we will have dormant roots for spring orders. This price is good so long as our dormant stock lasts. Each, 60c; per 10, \$5.00.

IRIS

Iris may be planted any time they are not in bloom. They will grow anywhere and are the best early flowering hardy plant we have. We have twenty varieties, varying in color from pure white to deep purple; blue, pink, red, brown, yellow and the combination of all. Prices, each, 15c; per 10, \$1.25; per 100, \$10.00.

HARDY PHLOX

The best perennial for a fine fall display of flowers through the summer and fall. Our twenty varieties give us bloom from July 15th, to severe frost, with the best display about August 15th to September 1st. The color range is from pure white, through the shades of pink, rose, red, lavender to purple. Prices, each, 25c; per 10, \$2.00; per 100, \$17.00.

LANDSCAPE DEPARTMENT

This department was discontinued during the late War. It has been taken up again, and is under my supervision.

My thirty years of growing and planting in Colorado has given me a wide experience which should save our customers time and money, also eliminating failure in planting.

We have at all times an assortment of well developed shrubbery and trees, both shade and ornamental that we use especially in this department.

In writing us give a brief description of the extent and condition of the grounds to be improved and the nature of the improvements you wish to make. A pencil sketch, giving dimensions, with a location of buildings, walks, drives and anything else of a permanent nature will be a help in determining your probable needs. We will then advise you, and where necessary, send you a plan showing our ideas as to your needs with a list of stock and cost of same for your approval. This service extends to Orchards as well, and is given without obligation to you as long as a personal visit is not required. Then a small charge will be made.

This department covers porch boxes, flower beds new lawns, fertilizing old lawns and tree trimming. In fact takes care of your whole grounds or estate.
